| Trax Payroll | Yes | National Service based in California | Handles small to mid-size plans |
| Ultipro or Ultimate Software | Yes | National Service | Ultipro can provide a file via the bridge IF the client has purchased the Data Exchange product with Ultipro. (We do not know what the cost of this program is). In addition, Ultipro treats every client as a custom set up or report and on average charges \$150.00/hr and can quote up to 29 hours for programming time. Ultipro can also provide a file for the Plan Sponsor to upload through the PSC if they do not have the program needed for the bridge, or, do not want to pay for the extra programming charge to implement the bridge. In any case, please set the expectation with your client before offering this service with Ultipro that there could be a significant cost/time element associated with this service on the part of Ultipro. The can offer the two-way service as well, again, this is custom for each client so can be expensive. |

ADP Product Guide

| Business or Client Size | ADP Product | Payroll Bridge File Transfer | Notes |
|--|---|------------------------------|---|
| Large 1000+ Employees | ADP Enterprise | Yes | These clients run Autopay Payroll and some run payroll on a Hosted Enterprise system. If they run on Autopay we can get a file from our Roseland connection. If they run on Enterprise we can run a file through that separate location in Ann Arbor MI. In addition, we have been able to set up a 2- way interface with the Hosting Center (Ann Arbor location ONLY) |
| Midsize 50-999 Employees | Dealer Services | No | ADP can not transmit a Payroll Bridge files for Dealer Services clients. Dealer Services is a payroll software that is exclusively used by automotive dealerships and auto repair shops. ADP can provide a limited PDI file to Plan Sponsors who use Dealer Services software |
| Small Market 1-49 Employees | Easy Pay | No | ADP can not transmit a Payroll Bridge pdi file for Easy Pay clients. Easy Pay is a limited service used by some employers with less than 50 employees. Easy Pay clients "phone in" their payroll or use an ADP electronic time clock terminal to transmit payroll. ADP Easy Pay clients can upgrade their service to Auto Pay for additional fees. Clients wishing to upgrade should contact their ADP sales representative. |
| Large 1000+ Employees | Global View | Yes | GlobalView services very large companies who have operations outside the United States. GlobalView is a separate company from the standard ADP payroll service. They have a unique system that is not integrated into standard ADP. Each new payroll bridge with GlobalView requires completely new programming and requires a longer than normal implementation process. |
| Large 1000+ Employees | Hosting | Yes | ADP Hosting Services transfers administrative responsibilities handled by ADP. |
| Mid to Large size 100-15000+ | HRB | Yes | HRB is a system for HR and Benefits. ADP has various payroll systems but they are separate from HRB. If clients have ADP HRB and ADP payroll they will be able to use the bridge. |
| Business or Client Size | ADP Product | Payroll Bridge File Transfer | Notes |
| Large 1000+ Employees | PayForce | Yes | Used for companies with 1000+ employees. ADP PayForce is the ideal payroll solution for large organizations that need best-in-class, hosted services with flexible access. ADP's PayForce's intuitive user interfaces deliver efficiencies that enable your payroll professionals to be more productive without sacrificing control. PayForce is accessible from any Internet connection, just log on to your payroll software |
| Large 1000+ Employees | ProBusiness | No | Pro Business was an independent payroll outsourcing service until they were acquired by the ADP Inc. At this time we do not have a customer using Pro Business. Therefore, we do not have a payroll bridge set up with Pro Business at this time and we are not sure if a bridge is possible |
| Small 10-100 Employees (can sometimes be larger) | Resource | Yes | ADP Resource is a Human Resource company. They are not a payroll company but do offer to sell ADP payroll as part of the "Resource" package. As long as they are using ADP Payroll, we can do the bridge. |
| Small 10-100 Employees (can sometimes be larger) | Run | No | ADP program designed for clients to use with smartphones. Run is a tool to enter data in EasyPay. |
| Small Market 1-49 Employees | Small Business | No | In California at least this line of business does not use the AutoPay platform and cannot send us a file. |
| Other | TotalPay | N/A | For both Autopay and EasyPay, ADP refers to the combination of ADP's direct deposit and check products as TotalPay. EasyPay is a small business payroll product that does not create vendor 401(k) files. Another payroll product for small business called RUN does not use the term TotalPay. If the client is using one of the "Workforce Now" or "Autopay" products with TotalPay they will be able to do the bridge. If they are using TotalPay with EasyPay, they will not. |
| Small 10-100 Employees | TotalSource | No | ADP Total Source is a separate company from ADP Payroll and offers ADP EasyPay as part of their product. Simplified PDI files can be produced if the client is willing to pay them for "custom programming" on a Report Smith style software. The typical Totalsource client is very small and is better off producing their own pdi file or doing manual entry. |
| Other | WorkDay Payroll Interface | No | If the client processes Autopay payroll and creates their 401(k) file destined for Retirement Partner (this is Great West or FAScore) from the Autopay Management Reports system, then we can receive a file through the Payroll Bridge Interface. |
| Midsize 50-999 Employees | Workforce Now (Previously sold as PayeXpert and PC Payroll) | Yes | Workforce Now is a new group of products that can be sold to an ADP client. At the core of this is PayeXpert. This creates the input to Autopay payroll. The Autopay platform is key to being able to provide a file for payroll Bridge. As long as the client is operating using Autopay, we can do the bridge. |

NON PAYROLL BRIDGE VENDORS ***

*** These Vendors will not send a file electronically via the "Bridge"

| Vendor | Payroll Bridge File Transfer | | Notes |
|-----------------------------------|------------------------------|--|--|
| Advantage Payroll | No | | Advantage Payroll does not support Payroll Bridge but can provide standard PDI files to Plan Sponsor to upload via PSC. |
| IOI - Interlogic Outsourcing Inc. | No | | IOI has decided not to offer the 'bridge' service at this time to any new clients. They will continue to create the PDI file for the plan sponsor to upload through the PSC. |
| Paychex | No | | Paychex will create a full PDI file for the plan sponsor which can be downloaded from their system and uploaded via the PSC. |
| Payroll 1 (One) | No | | Payroll One will create a full PDI file for the plan sponsor which can be downloaded from Payroll One and uploaded via the PSC. |
| Performance Payroll | No | | Performance Payroll does not submit a file electronically via Payroll Bridge, but will upload files on behalf of the plan sponsor via the PSC. The Plan sponsor then approves and completes the files themselves on our website (PSC). |
| Trinet | No | | Trinet will no longer provide payroll bridge services effective 4/1/2013 |
| Trivantus | No | | Trivantus uploads files and processes for their clients through the PSC. |
| Workday Payroll | No | | Workday is a standalone company that provides an HRIS system that can create a file that can be input in to a "third-party payroll system", whether this be ADP or others. Related to ADP specifically, if the client processes Autopay payroll and creates their 401(k) file destined for Retirement Partner (this is Great West or FASCore) |
